Nepal Airlines Corporation

Sundhara, Kathmandu

Subject: Sponsorship request to support Hult Prize Summit Participation

Dear Sir,

I hope this letter finds you well. I am writing to request sponsorship from Nepal Airlines for the participation of Amrit Science Campus in the Hult Prize 2024 Bangkok summit.

The Hult Prize Foundation is a disruptive global leader in social entrepreneurship and youth empowerment for the 21st century. The Hult Prize has brought impact focused programs, events, and training to over a million students globally from 120+ countries, creating a pathway for youth everywhere to take action to build a better world. Each year, tens of thousands of university students from dozens of countries participate, by working to create high-impact startups that address the annual challenge in alignment with the UN Sustainable Development Goals.

Team '**Eco Thaili**' after emerging victorious in our OnCampus program has been selected to represent our campus at the Hult Prize Regional Summit in Bangkok. The team, along with the campus director, myself, will be representing Amrit Science Campus at the Bangkok summit to be hosted at **Chulalongkorn University** on **June 21-24, 2024**. We are among the **360 teams out of 10,000** from around the globe advancing to the summits.

Under my leadership, we organized the OnCampus program of Hult Prize at Amrit Science Campus, attracting participation from 11+ teams. The program aims to inspire and engage students in social entrepreneurship, challenging them to develop innovative solutions to pressing global issues.

The Hult Prize Regional Summit is a part of a series of events happening simultaneously in 8 countries. The winning team from each regional summit will advance to the global accelerator, where they will receive mentorship, advisory, and strategic planning as they create prototypes and set-up to launch their new social business. The final round of the competition will be held at London, where one team will be awarded 1 million USD to fund their idea.

'Eco Thaili' has developed an innovative solution to tackle the environmental challenges posed by single-use plastics. Their idea involves creating **plastic-like alternative bags from banana fiber**, providing a sustainable and eco-friendly alternative to traditional plastic bags. The team has also prepared a prototype to demonstrate what their product will be like.

I am proud of their achievement and believe that their participation in the regional summit will not only showcase their innovation but also reflect positively on our institution and country.

As full-time students from a government college, we are facing financial constraints in affording travel to the Hult Prize Summit in Bangkok. We would be immensely grateful if Nepal Airlines could offer us a substantial discount on airfares for our trip to Bangkok, thus enabling us to participate in this prestigious event. We would happily feature Nepal Airlines in our press releases in popular media houses, and integrate branding materials wherever applicable including our social media handles on Facebook, LinkedIn and Instagram.

Any support you can provide would be greatly appreciated and will make a significant difference in helping Amrit Science Campus participate in this prestigious event for the first time in history.

Attached to this letter, you will find our OnCampus program report, our invitation letter and the business proposal of 'Eco Thaili'. These documents provide further insight into the success of our program and the innovative solution developed by the winning team. We hope this additional information will help you understand the impact of your potential sponsorship and the importance of supporting 'Eco Thaili' in their journey to the Hult Prize Regional Summit.

Thank you for considering our request. I am confident that with your sponsorship, 'Eco Thaili' will make a significant impact at the regional summit.

Please feel free to contact me at 9741826751 or hultprizeascol@gmail.com to discuss this opportunity further. We look forward to your positive response.

Samip Lamsal

Campus Director

Hult Prize at Amrit Science Campus
